Sideline Out-of-Bounds Plays

Four of Michigan State's sideline out-of-bounds plays are presented. You can call them whatever you want.

Line-1

This is good for an open 3-point shot (also see the video clip below). O1, O4 and O5 line-up as seen in diagram SOB1. O3 starts at the ball-side block and cuts up a little to receive the inbounds pass from O2. Meanwhile O1 cuts around O4 and O5 to the weak-side wing area. After passing, O2 makes a hard basket-cut for the possible give-and-go play with O3. If the give-and-go is not there, O2 continues to the opposite corner. O1 fakes the basket-cut, reverses direction and comes over the O4-O5 double-screen (diagram SOB2). O1 is often open for the 3-point shot here. O5 can slip the screen for the pass from O3. O4 might also be open for the 3-point shot (diagram SOB2B).
